

Center	Database Title	Description	URL
IWMI	Library Catalog	Library collection searchable by all fields, author, title, keywords, title + keywords, and publication year.	<a href="http://iwmi.catalog.cgiar.org/gryscr/catalogbs.htm">http://iwmi.catalog.cgiar.org/gryscr/catalogbs.htm</a>
	IWMI Publications	IWMI's on-line publication section contains several thousand pages of peer reviewed research on water management.	<a href="http://iwmi.cgiar.org/Publications/index.aspx">http://iwmi.cgiar.org/Publications/index.aspx</a>
	IDIS – Integrated Database Information System	An on-line data sharing platform that provides access to water, agriculture and environment scientific data. It contains over 1 billion records with focus on IWMI and CPWF basins. It is funded by the CPWF and IWMI and hosted in Colombo, Sri Lanka.	<a href="http://dw.iwmi.org/idis_DP/home.aspx">http://dw.iwmi.org/idis_DP/home.aspx</a>
	Estimates of Environmental Flows Worldwide	This database is a collection of actual estimates of environmental flows made by various methods, together with hydrological characteristics of respective rivers and associated environmental management objectives. It is being developed by IWMI in collaboration with TNC and UNEP GEMS/Water as part of the activities of UNESCO Task Force on Eco-Hydrology.	<a href="http://dw.iwmi.org/ehdb/efr/wetlandvisitor/information.aspx">http://dw.iwmi.org/ehdb/efr/wetlandvisitor/information.aspx</a>
	Environmental flow assessment for	The database summarizes the information on features and	<a href="http://dw.iwmi.org/ehdb/efm/efm.asp">http://dw.iwmi.org/ehdb/efm/efm.asp</a>

	aquatic ecosystems: a database of methodologies	applications of various methodologies for Environmental Flow Assessment EFA on a country-by-country basis.	
	Quantification of hydrological functions of inland wetlands	This database is intended as an inventory of quantitative statements on wetland functions from various sources. Each quantitative statement in this database is associated with the type of wetland, function, location, size, study type, etc.	<a href="http://dw.iwmi.org/ehdb/wetland/wetlands.asp">http://dw.iwmi.org/ehdb/wetland/wetlands.asp</a>
	GeoNetwork Node	Provides easy access and discovery of geospatial data, and data sources, at the all CG Centers. This dedicated GeoNetwork Node is provided by the CGIAR-CSI to support, facilitate and allow easy data sharing of geographically referenced spatial and thematic information.	<a href="http://geonetwork.iwmi.org:8080/geonetwork/srv/en/main.home">http://geonetwork.iwmi.org:8080/geonetwork/srv/en/main.home</a>
	RS/GIS Data Storehouse Pathway (DSP)	IWMI DSP Metadata/Data search	<a href="http://www.iwmidsp.org/iwmi/metadata/index.asp">http://www.iwmidsp.org/iwmi/metadata/index.asp</a>
	Tsunami GeoNetwork Node	Provides easy access and discovery of geospatial data, and data sources, in Tsunami affected areas. This dedicated GeoNetwork Node is provided by the CGIAR-CSI to support reconstruction and development in the wake of the Asian Tsunami disaster. It is intend to facilatate and allow a variety of organizations to easily share geographically referenced spatial and	<a href="http://tsunami.csi.cgiar.org/tsunami/srv/en/main.home">http://tsunami.csi.cgiar.org/tsunami/srv/en/main.home</a>

		thematic information.	
	African Transboundary Water Law Database	This is a searchable database of more than 150 different treaties, amendments and protocols which have been signed to manage the use of Africa's transboundary waters.	<a href="http://www.africanwaterlaw.org/">http://www.africanwaterlaw.org/</a>
