

Center	Database Title	Description	URL
WorldFish Center	Fishbase	<p>FishBase is the world's premier information system on the world's fishes, with detailed information on almost all of the known world fish species. Recently the 30,000th species was added to the database; it now includes more than 96% of all known species).</p> <p>The FishBase database is a one-stop site for fisheries and fish biodiversity information.</p>	<a href="http://www.worldfishcenter.org/v2/resource-fishbase.html">http://www.worldfishcenter.org/v2/resource-fishbase.html</a>
	Images	A collection of images produced by WorldFish staff.	<a href="http://www.worldfishcenter.org/v2/newsroom.html">http://www.worldfishcenter.org/v2/newsroom.html</a>
	Library Catalog	The key to searching and retrieving information from the Worldfish Center Library Catalog	<a href="http://www.worldfishcenter.org/information_resources/fishlib.asp">http://www.worldfishcenter.org/information_resources/fishlib.asp</a>
	Reefbase	ReefBase is an online information system providing high quality data and GIS maps on the location, status, threats, monitoring, conservation and management of coral reef resources in over 130 countries. ReefBase serves as the central repository for the Global Coral Reef Monitoring Network (GCRMN) and ICRAN, and continues to provide valuable information services to managers, policy-makers,	<a href="http://www.reefbase.org">www.reefbase.org</a>

		<p>researchers, educators and students around the world.</p> <p>ReefBase strives to improve sharing and use of information and knowledge through new projects and focused partnerships in ongoing support of research and management of coral reef resources. ReefBase allows unprecedented access to a wide range of coral reef related datasets from multiple sources on interactive maps. These data include the coral bleaching, Marine Protected Areas, Millennium Mapping data and many more.</p>	
	<p>Trawlbase</p>	<p>TrawlBase is the name commonly used for a powerful data management tool properly called the <b>Fisheries Resource Information System and Tools</b> or <b>FiRST</b>. The database carries regional fisheries survey data from trawling in Asian territorial waters since the 1920s development of a regional repository for marine resource survey data. It contains which currently contains species abundance data from over 21,000 locations (335,980 records) in the coastal waters of South and Southeast Asia. FiRST also houses social and economic data on the 10 million people involved in the fishing industry</p>	<p><a href="http://www.worldfishcenter.org/v2/resource-trawlbase.html">http://www.worldfishcenter.org/v2/resource-trawlbase.html</a></p>

		in the eight countries.	
	WorldFish Publications	This publications database covers WorldFish publications as well as works in other publications by WorldFish scientists and researchers. Access to the WorldFish library is through the <i>Resources</i> link.	<a href="http://www.worldfishcenter.org/v2/pubs.html">http://www.worldfishcenter.org/v2/pubs.html</a>
